Art Unit 1711

The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ 2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 5,922,253. Although the conflicting claims are not identical, they are not patentably distinct from each other because atomization to produce microdroplets was notoriously well known at the time of the invention in order to produce liquid droplets such as for instance by means of a pump type or pressure aerosol can for producing an (atomized) mist of hairspray etc. Therefore it would have been obvious to a practitioner having ordinary skill in the art at the time of the invention to form the microdroplets required by Herbert et al. '253 by atomization motivated by the requirement for forming microdroplets and by the notoriously well known process of atomization of liquids and in the expectation of

adequate results absent any showing of surprising or unexpected results.

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,358,443. Although the conflicting claims are not identical, they are not patentably distinct from each other because the species of the patent are embraced by the species of the claims and that choice of a particular species would have been obvious to a practitioner having ordinary skill in the art at the time of the invention in the expectation that one species would work as well as another absent any showing of surprising or unexpected results.
